

Interaction of asymmetric homophily and simulated media bias

Symmetric homophily

A $h_{ss}=0.25, h_{oo}=0.25$

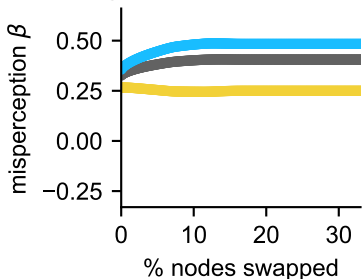

B $h_{ss}=0.5, h_{oo}=0.5$

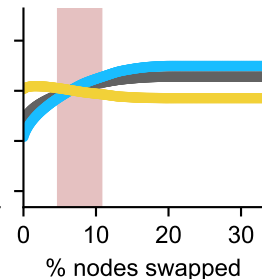

Higher opponent homophily

C $h_{ss}=0.25, h_{oo}=0.75$

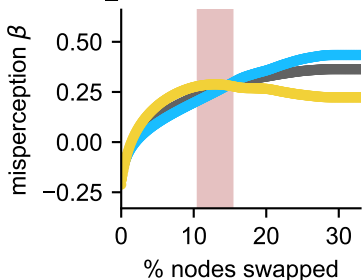

D $h_{ss}=0.5, h_{oo}=0.75$

Higher supporter homophily

E $h_{ss}=0.75, h_{oo}=0.25$

F $h_{ss}=0.75, h_{oo}=0.5$
